

Hi All!

GB3FK Repeater News

Well it has been a while since the last newsletter so thought it was time to give some updates.

The repeater went away to A&E a while back (To Dons!) to have some work done on it.

For a short period of time we thought we had it solved for Yaesu users and the TSQL problem. But in fact, the problem is still there. Thanks to Colin, and Paul for the reports.

The repeater will be going back to Don's sometime in August for another mod to try and solve this problem.

Remote System MB7IMP-L

A few problems with the remote system which include:

If the repeater is in use in Folkestone, it doesn't always come out on the Link frequency. This is a known problem, and is a problem with Eric interface. This is also hoped to be resolved soon.

The Repeater Site

The site remains the same, with no problems.

RSGB News Broadcast

The News broadcast continues to work problem free on Sunday evenings. It's a shame that the net isn't as big as it used to be after the news. I know many listen, but a quick hello after would be nice. I try to make it as often as I can on Sundays for the Net, however other things do pop up from time to time. If I am not around to run the net, maybe someone else can it?

Summer BBQ

The summer BBQ was a great success a big thank you to Tony and Anne for allowing us to have the BBQ at there QTH, also to Stan G6ZNW for doing the BBQ, to everyone that brought along raffle prizes and gave donations. It's much appreciated. We managed to raise around £90 for the repeater group. Thank you.

Keep up to date with repeater news on the website www.gb3fk.com

Enjoy the rest of summer
